RECEIVED

DEC 10 2003

**AIR ENFORCEMENT BRANCH,
U.S. EPA REGION 5**

SUBJECT Crawford Generating Station
 Planned Non-scheduled Asbestos
 Removal Estimates for 2004

Dear Mr Halford

Attached is the Annual Planned Non-scheduled Asbestos notification for the Crawford Generating Station located at 3501 S Pulaski Road in Chicago, Illinois. The removal of asbestos at this location necessitated by the routine failure of equipment is expected to exceed the combined additive amount of either 260 linear feet or 160 square feet during the 2004 calendar year. Therefore, we submit this notification to fulfill the Federal Regulation as required by *40 CFR 61.145 (b)(3)(iii)*.

With regard to planned asbestos removal during scheduled equipment outages or other asbestos renovation jobs that do not require equipment outages, advance notifications will be given in accordance with *40 CFR Part 61.145(b)*. In addition, all emergency asbestos handling activities will be reported as early as possible. For each notification, we plan to use the State Asbestos Notification of Demolition and Renovation form. Similarly, a revised notification form will be submitted whenever the amount of asbestos reported in the original notification changes by 20 percent, when there is a change in the start date or if there is a change in the scope of work.

At this time there is no asbestos demolition work planned or expected at the Crawford Generating Station during 2004. If however, asbestos demolition work does become necessary, a prior 10 working day written notification will be given.

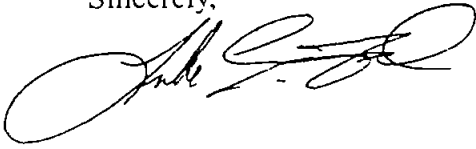

In summary, all asbestos removal work in which we are involved will be handled in strict accordance with applicable Federal and State asbestos regulations.
